PERSICA AND MAYER GUESTS OF UNCLE SAM

Joe Persica and Sid Mayer, former Memphis merchants, will leave Thursday significant for Atlanta, Ga., where they will make their former for a year and a day, guests of the government in the pentlentiary. They were sentenced Thursday morning by Federal Judge John E. McCall to the pentlentiary after the United States directly court of appeals at Cincinnati affirmed their conviction in the head court between

detectives, about the operation of bookmaking on horse races in Memphis.
Smith says he told them to close the
books. The books are still open and
liurs and Mahon are suspended.
"I suspended thurst and Mahon because they refused to carry out orders,"
said the chief. They were ordered to
close out handbooks and falled to de
se. I went to the places and arrested
the men myself and suspended Hurst
and Mahon. Now it is up to the commissioner of fire and police whether or
not they are reinstated," is Smith's
statement. In the old days when four very problem. Memphians operated a poolfrom at Hoperield the police demonstrated that bookmaking could be kept
closed in Memphis. The Big Kour wanted no competition on this side of the
river. The Hoperield game made them
fortunes. The police kept bookmaking
out of Memphis. It can be done easily
if the authorities want it done.

COTTON MARKETS

Thursday Afternoop, Murch 6.
Tracking was resumed in both the domestic speculative and cotton markets this morning, but everybody was more or less at sea and apparently awaiting developments. It was generally recognized that the new order of things would take time for adjustment, but that after all the course of prices would be governed by the demand for the actual 80 far as could be seen there has been little change in the attitude of spinners during the past few days and maintaily the confusion in the future department tended to further delay operations. being disposed evidently to be patient and seew how the markels on this side are afefcted.

At the start in New York prices of the old style contracts were but little changed from the close of Monday, May being up 20 points, but October being up but 8. Old May opened at 21.30c, while the new opened at 21.30c, while the new opened at 21.30c, while the new dipped to 21.80c, thus narrowing the difference to about 80 points at their lowest, which seemed to be regarded as about right. The difference on July was not quite as much and on October it was still less. Later in the day some recovery took place, May old style selling back as high as 21.50c, while the new touched 22.18c, the difference being reduced to around 70 points. Differences between other positions were likewise reduced some.

There was little news to influence values and traders were received most in trying to get a line on what differences should be. The general tone was quiet and fairly steady, but absence of indication of spot demand did not encourage bullish feeling. The weather map was none too good, for temperatures were too low in the western and central beit for farm work, while in the eastern more rains fell. The promise was for warmer and more rains in the eastern more rains fell. The promise was for warmer and more rains in the west, which is beginning to bring about more talk of a late start. However, this is not having much weight yet as a price factor. The talk of reduced acreage is also for the time being not being talked of auch, but information from every direction is that there will be a reduction, while continued firmness in grains and mean is sure to serve as encouragement for enlarging production of them in the cotton beh.

DAILY STATEMENT.

TOKIO, March 6. (Correspondence of the Associated Press.)—The shortage of the rice crop is causing unusual anxiety throughout Jainan. The crop this year is 30,000,000 bushels less than the average. As the annual consumption is 300,000,000 bushels less than the average. As the annual consumption is 300,000,000 bushels less than the average. As the annual consumption is 300,000,000 bushels less than the average. As the annual consumption is 300,000,000 bushels less than the average as the annual consumption is 300,000,000 bushels less than the average as the annual to such early 10 per cent. Elizeless days are suggested, but it is not easy to adopt the pinn of western countries and enforce riceless days.

In America, wheat bread forms a relatively small part of the daily food, whereas in Japan and all eastern countries, rice is consumed in large quantities and constitutes the real meal, the other food articles being of the nature of relishes or side dishes, so while the plurase "riceless days" is easily spoken, it would practically mean foodless days for the mass of the people.

The situation is perpixing not only from the food point of view, but also politically. There was a race riot on Dec. 15 at Toyans, in the interior.

The working class during the past year wasted rice. They were earning large war wages and were able to leave their scantier diet of coarse sweet postatoes and the tile, and cat as much first class rice as they wanted. If they are compelled to return to their old diet it is feared they may become tumiltous. Some predict that rice will reach the equivalent of \$7 a bushel before next autumn.

NEW YORK COTTON.

NEW YORK, March 6.—The cotion market was active and unsettled at the reopening for liquidation of old style and trading in the new style contracts today. There was no business in the new style March contract, but May and later new style deliveries sold about 100 to 135 points above corresponding oid style contracts on the call. At this difference local and Southern spot houses were sellers of the new style deliveries which showed a tendency to work nearer the old style after the call. The opening was irrogular at an advance of 150 points to a decline of 21 points on the old style contracts. April being 150 points higher and other months 25 points higher to 22 points lower. Later old style May sold off from 21.75c to 21.92c. Or 18 points net lower, while the new style May seed from 23.00c to 21.90c.

Trading was almost entirely in the way of switching from old to new style contracts and the business of this sort became less active as the difference between the old and new deliveries narrowed. Around midday the new style contracts were ruling only 45 to 71 points above the closing price of last Monday. The interest of traders seemed to center almost entirely in the trans-

NEW YORK, March 6 - Metals were the only important exception to the higher trend at the opening of today's stock market, coppere holding back in subject to the stock market, coppere holding back in anticipation of dividend reductions late in the day. Advances of 1 to 2 points marked the early dealings in motors and subsidiaries, with Kelly-Springfield Tire at a new high record Among oils, shippings, leathers and several of the equipment issues gains extended from the total points, but United States Steel and high-grade rails made only fractional improvement.

Copper shares rebounded vigorously after publication of the several dividend reductions, indicating that such action had been discounted. Size! Foundries strengthened on the increased onto the like advance, with May \$1.2% to \$1.29½ and July \$1.24% to \$1.29% and July \$1.29% and July \$1.24% and \$1.29% and \$1.29

of the cotton market today after double holidays and the change in the cotton futures act. Two forms of contracts were traded in, the old style and the new style in conformity with the amendment to the futures act. On the opening call and immediately after, the lendency was to advance, old style contracts gaining 13 to 22 points, while the new style contracts were 116 to 172 points over Monday's close on old-style contracts, indicating that the trade considered the new contract much more valuable than the old.

The market for old contracts softened under liquidation by longs and went 8 to 35 points under Monday's close, but toward moon recovered and finally stood 6 to 7 points up net. New contracts fell sharply, losing 60 to 115 points from the high levels established around the opening.

The market became quiet, but steady At 1 o'clock the old style contracts were 8 to 12 points over Monday's close and the new style were 50 to 51 points down from the highest of the day.

STUDENT STRIKE STILL ON AT VANDERBILT

NASHVILLE. Tenn., March 6.—
Chancellor Kirkland of Vanderbilt university last night refused to take any action in regard to the demand of the student hody that the reserve officers training corps course be made optional. He told the committee of students that so long as the students remained on strike he would take no steps to arbitrate the trouble.

In the meantime, practically the entire student body is refusing to attend the drills or to take any part in mass athletics under direction of Maj-Gen. Anderson, U. S. A.

stabilized and developed into profitable and lucrative undertaffings.

Only 60,000 farms out of 6.581,000 according to the 1810 census, employed managers. The small percentage of profits of inefficient management, of die and incorpetent management, makes thousands of farmers not living on their places very desirous to secure farm managers capable of inducing farm management, and in most this growing need the course in farm management for disabled soldlers has been evolved by the federal hourd for vocational education, and indications are that the demand for these well-trained men will considerably exceed the size

LAW REPLIES TO

Lendon viva Montreals March 6—Andrew Borlar Law, government leader in the house of commons, replied last night to some questions raised in a debate on foreign affairs that his been in progress in the house.

As regards Bolshevism, Mr. Bonar Law said few people now had any illusions about it. The allies were agreed something must be done for Russia, but none of them, he declared, would recommend dispatching the necessary forces to quell the anarchy there. As to indemnities, Mr. Bonar Law said the government realized the country expected to get the best possible indemnities from Germany, and he emphasized the point that it was Great Britain's business to get every penny it could, but it was useless to hold out the hope that the indemnities would wine out the country's immense war debt.

Mr. Bonar Law agreed it was urgent
